Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 24 May 2005 has been entered.

Oath/Declaration

Applicant's remarks on page 2 of the response filed 5 January 2005 concerning the priority claim have been considered. The oath claims foreign priority to the 2002-07401 application and a certified copy of the document has not been received. In light of applicant's remarks, it is clear that applicant is waiving this priority claim. Therefore the sole priority claim is to the 2002-37461 application. However, the oath must be corrected.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

Allowable Subject Matter

Claims 1-3, 5-7, 9 and 11 are allowed.

The primary reason for the allowance of claims 1-3 is the inclusion of the limitation of an apparatus to control static electricity in an ink-jet printer including a ground member torsion spring that is wrapped around the frame and has a first end elastically contacting the pinch roller and a second end elastically contacting the frame. It is this limitation found in the claims as it is claimed in the combination of which has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 5 is the inclusion of the limitation of an apparatus to control static electricity in an ink-jet printer including a pinch roller molded portion including a conductive synthetic resin. It is this limitation found in the claim as it is claimed in the combination of, which has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

The primary reason for the allowance of claims 6, 7 and 9 is the inclusion of the limitation of an apparatus including a ground member to ground the second roller to the frame, to control static electricity occurring in the paper passing between the first and second rollers wherein the ground member is a torsion spring having an end elastically contacting the frame. It is this limitation found in the claims as claimed in the combination of, which has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 11 is the inclusion of the limitation of a printer comprising a frame to support the rollers and a torsion spring that is wrapped around the frame and contacting one of the rollers so that the static electricity is removed from the printing medium before being conveyed to the print head.

Conclusion

This application is in condition for allowance except for the following formal matters:

Correction of the oath/declaration.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
